4. PROJECT DATA

- a. Current objectives - Promoting evolutionary, revisionist divisive developments within the Albanian Communist Party. The radio programs are written for the consumption of the rank and file members of the Albanian Communist Party.
- b. Changes in operational mechanism. More operational supervision will be taken over by career agent ☐ ☐ thus obviating the need for excessive staff officer time expenditure. Policy direction will, of course, be adequately maintained.
- c. Intelligence production. The career agent spends approximately one-half his time interrogating Yugoslav and Albanian refugees. The positive and operational information resulting from his efforts are transmitted to Headquarters under the Albanian and Yugoslav FI projects.
- d. Analysis of effectiveness.

- (1) In January 1959, a legal traveler agent reported that a Communist relative had mentioned listening to OBTEST with the comment that the "Communist sponsors" of the radio would have done better to have remained inside Albania and tried to improve the situation from within.
- (2) On 4 March 1959, the Secretary of the Albanian Communist Party Enver Hoxha, in a major speech to the Albanian Communist Party denounced OBTEST as a revisionist tool of the United States working in conjunction with Yugoslavia and located in Athens, Greece.
- (3) In May 1959, we received a report from a legal traveler returnee from Albania that he and his friends listened to OBTEST in Albania from September 1958 to January 1959 and that an Albanian Communist friend of his stated that "in a way all Albanians are sympathetic with the Program".

Analysis of the current effectiveness of the project in carrying out NSC objectives.

We believe that OBTEST contributes to Agency efforts to disrupt Soviet controlled Communism through the spreading of the revisionist doctrines and "National Communism" in Albania because of the evidence as cited in the previous section, and also because of the following facts: Our monitoring reports confirm that there are little or no jamming facilities in Albania, consequently OBTEST can be clearly received within Albania most of the time. Although there are comparatively few radios in Albania (estimated at 50,000) most of our target audience (Albanian CP members) do have radios and can listen to OBTEST if they so desire. The aborted attempt of the "National Communists" in Albania in February of 1956 to overcome the Stalinist regime, and the repeated anti-revisionist campaigns by the Albanian regime indicate that the disruptive effects of "revisionism" is one of the main vulnerabilities of the Albanian regime. The excellent qualifications of the OBTEST script writer and his ability to produce scripts which are well written in the Communist jargon leads us to believe OBTEST is well suited to exploit the Albanian CP target.

e. Cover, Control, Security.

The career agent ☐ has regular DAC Cover and type B clearance. The indigenous agent AIPLEBE has OA clearance and nominal commercial cover representing an American market research group. This is only for purposes of providing a cover story for his relatives and friends because the Greek I.S. is fully aware of his covert duties. AIPLEBE is dependent financially on the salary received from us, and his residence in Greece is dependent on the graces of the Greek authorities. In addition he is motivated against the present Albanian regime for personal reasons and is ideologically attracted to "National Communism" or "Socialism". Because of AIPLEBE's demonstrated competence, the ☐ Disaster Plan has been amended to include evacuation of AIPLEBE in order to be able to utilize his services elsewhere.

f. Assessment of indigenous agent

AIPLEBE meets on an almost daily basis with his case officer. He is a well qualified and competent script writer as well as an industrious worker. Having been a former member of the Albanian CP who was purged for what he considers unjust and false charges, he is personally motivated to work against the present leadership of the party. His weakness lies in his use of alcohol which at times becomes excessive.

g. American project personnel

The staff officer will be ☐ and the individual responsible for the day to day operating management will be career agent ☐ a naturalized American citizen.

h. Liaison with intelligence services

The Greek intelligence service by agreement at the initiation of the project is kept informed on all pertinent developments in the project. Although no problems have come up as a result of this arrangement thus far, the fact remains that any problem involving Greek-Albanian relations is subject to the dictates of the Greek government.

i. Interagency coordination

Not applicable

j. Plans for the ensuing year

The low relative Agency priority on Albania dictates less time will be available for Albanian projects such as OBTEST; consequently the number of our programs may be reduced. However, the greater experience of the OBTEST personnel should compensate for the decrease in man hours that will be spent in supporting the project.
